# **COMMUNITY MODULE REPORT**

**VOLUME VI**

**FEBRUARY 2026**

This report presents the community-level findings from the National Population and Housing Census 2024 undertaken by the Uganda Bureau of Statistics (UBOS).

**Recommended Citation**

Uganda Bureau of Statistics 2024: The National Population and Housing Census 2024 – Community Module Report, Kampala, Uganda.

## PREFACE

---

I am pleased to present to you the Community Statistics Monograph from the National Population and Housing Census, 2024. It has been developed to inform planning and decision making at the community level. The Monograph, therefore, highlights the social dynamics of communities in Uganda, the facilities and services accessible and challenges experienced while accessing them.

The Community Statistics Monograph provides the spatial distribution and accessibility of social and economic infrastructure such as education and health facilities, and manufacturing and service establishments across Parishes, within Districts and Cities. In addition, the Monograph documents Parish-level agricultural production and environment characteristics, and the incidence and patterns of community-based violence.

This Monograph provides benchmark data and statistics for community profiling. There are current data gaps that are to be addressed through strengthening administrative and community data systems. In addition, periodic studies will be undertaken to address the data gaps.

The Board, Management and staff of UBOS are grateful to the Government of Uganda for its commitment and support to the undertaking of the National Population and Housing Census, 2024. The Bureau is also indebted to the citizens of Uganda for their cooperation, private sector, academia, media and development partners for their support towards a successful census.

I appeal to the public, planners, decision/policy makers, researchers and the academia to make use of this information.

## EXECUTIVE SUMMARY

---

The NPHC 2024 undertook a Community Module to characterize the communities in Uganda. The findings are hence presented in this monograph in eight chapters including: Financial services, Health services, Education services, Business and Service establishments, Agricultural production, Environment, Crime Violence and harmful practices. A summary of the findings is hereby presented.

The results indicate that financial services in the communities include Commercial Banks (49.3%), Micro Finance Institutions, (82.9%) and Deposit Taking Institutions (64.4%). The National Commercial Bank Branch Density was estimated at 2.9 per 100,000 adults and 12.6% of the parishes in Uganda had at least one Banking agent. Findings also indicate that 69.6% of the parishes in Uganda had at least one mobile money service. SACCOs with fixed location are reported at Parish level and Kampala Capital City had the highest percentage (82.0%) while Madi Sub-region had the lowest (24.4%).

Results further indicate that the country had 232 Hospitals, 81 of which 81 are Government funded, and that 61% of the districts and cities had at least one hospital. There were 272 Health Centre IVs; 73.1 percent being Government founded and 87.7 percent of the districts and cities had at least one Health Centre IV, irrespective of the founding body. Results also indicate the Uganda had 2,142 Health Centre IIIs, of which 1,439 were Government founded. Sixty-one percent of the Sub-counties had at least one HC III.

In terms of education services, 78.5 percent of the parishes in the country had at least one primary school. Results by founding body show that 58.0 percent of the primary schools were government-founded, and 44.9% private. On availability of secondary schools, 72.3 percent of the sub-counties in the country had at least one secondary school; and 96.6 percent of the districts and cities had at least one BTVET institution.

Findings on water for agricultural production indicate that the most common communal source of water for production was direct rain during the season, reported by 97.2 percent of the parishes; followed by borehole (65.3%). On challenges of agricultural crop production, crop diseases, insufficient agricultural land and lack of improved seeds were each reported by at least 94 percent of the parishes. Additionally, 93.1 percent and 92.5 percent of the parishes reported theft of animals and pests of animals respectively, as the common livestock production challenges.

Results about the environmental in the country showed that 66.0 percent of the parishes had wetlands, 59.7 percent had natural water bodies and 43.9%, natural forests/woodlands. Wetland encroachment was reported by 50.5% of the parishes, while that of natural forests/woodlands, 26.1 percent of parishes, and 36.4 percent for natural water bodies.

In terms of climate change, up to 63.7 and 63.1 percent of the communities experienced famine and drought respectively. Additionally, 75.7 percent of the parishes reported changes in rain seasons, while 41.8 percent reported an increase in temperatures.

Theft/ burglary/robbery was the highest form of crime reported in communities, reported 87.7 percent of the parishes. Domestic violence was experienced reported by 91.3 percent of the parishes, and rape, 35.2 percent. Incidences of Child battering and neglect were reported by about 72 percent while 62 percent experienced child marriages. Female Genital Mutilation (FGM) was reported in 3.1 percent of the communities.

## GLOSSARY

---

**A money lender** is a person or group of persons who typically offer(s) small personal loans.

**A Mobile Money Agent** is a business unit contracted to facilitate transactions for users on behalf of financial institutions. The most important of these are cash-in and cash-out (i.e. loading value into the mobile money system, and then converting it back out).

**Agent bank** is a business entity contracted by a financial institution to provide financial institution business on behalf of the financial institution.

**A Commercial Bank** refers to a financial institution licensed by the Central Bank, that accepts deposits, offers loans, and basic financial products like certificates of deposit (CDs) and savings accounts to individuals and businesses.

**A Village Savings and Loans Association (VSLA)** is a self-managed savings and credit group that does not receive any external funding. It is self-capitalized using the Rotating Savings and Credit Association (ROSCA) model, where people pool their savings and borrow from them.

**Microfinance institutions (MFIs)** are organizations that provide savings and/or credit facilities to micro and small-scale businesspeople.

**Savings and Credit Co-operatives (SACCOs)** are community membership-based financial institutions that are formed and owned by their members in promotion of their economic interests.

**Micro Deposit Taking Institutions [MDIs]** are formal financial institutions that are fully regulated by the Bank of Uganda and serve small microenterprises with a broad range of financial services targeting low income and the economically active poor in urban areas.

**A sole proprietorship** is a business owned and controlled by an individual.

**A partnership** is a form of business where two or more people share ownership, as well as the responsibility for managing the company and the income or losses the business generates.

**A private limited company** is a company established by a few individuals privately. The shareholders of a private limited company cannot trade their shares publicly.

**A public limited company** is a business that is managed by directors and owned by shareholders and can offer shares to the public.

**A statutory corporation** is a government entity created as a statutory body by statute. Their precise nature varies by jurisdiction, but they are corporations owned by a government or controlled by national or sub-national government to the extent provided for in the creating legislation.

**A cooperative** is an association of persons (organization) that is owned and controlled by the people to meet their common economic, social, and/or cultural needs and aspirations through a jointly-owned and democratically controlled business (enterprise).

**Religious organizations** are organizations whose identity and mission are derived from a religious or spiritual tradition, and which operate as registered or unregistered, nonprofit, voluntary entities.

## 1.0 INTRODUCTION

---

### 1.1 Background

**T**he National Population and Housing Census 2024 (NPHC 2024) was designed and implemented to generate reliable and accurate statistical data to support evidence-based planning and decision making. The data will play a crucial role in monitoring and evaluating progress and achievement of National, regional and International Development Frameworks including: the National Development Plans (NDPs), East African Community Vision 2050, Africa Agenda 2063 and 2030 Agenda for Sustainable Development.

Population and Housing Censuses are the Government's largest peacetime and logistically demanding statistical undertakings world-wide. The National Population and Housing Census 2024 is the eleventh in the series of Censuses Uganda has conducted, six (6) of which were conducted in the post- independence period. Earlier population counts were conducted in 1911, 1921 and 1931, while more scientific censuses were conducted from 1948 to date. The African and non-African populations were enumerated separately in 1948 and 1959. During the post-independence period,

Population Censuses were conducted in 1969, 1980, 1991, 2002, 2014 and most recently in 2024. These were national in nature with both Ugandan and non-Ugandan populations being enumerated simultaneously. The NPHC 2024 conducted during the period 10th – 26th May 2024, marking a significant milestone as Uganda's first digital census.

### 1.2 Objectives of the Community Module

The main objective of the Community Module of the National Population and Housing Census (NPHC) 2024 was to generate up-to-date, reliable data and statistics on the status and characteristics of communities across the country.

The specific objectives are to:

- (i) Collect baseline data on key social dynamics, challenges, and environmental conditions affecting communities.
- (ii) Assess the availability and accessibility of facilities and services in key sectors such as finance, health, education, and manufacturing across the country.
- (iii) Provide community-level statistics to support planning, policy formulation, and

decision-making within national and international development frameworks, including the Parish Development Model, National Development Plan IV (NDP IV), and the Sustainable Development Goals (SDGs).

- (iv) Enhance statistical infrastructure and capacity within Local Governments to support community profiling and data management under the Community Information System and the Parish Development Model.

### **1.3 Implementation of the Community Module**

The NPHC 2024 Community Module Report is one of the monographs to be produced from the census exercise. While the Household Module focused on collecting data about individuals, households, and their characteristics, the Community Module was designed to gather information on the general characteristics of communities and the services available to them.

In the context of the NPHC 2024, a community was defined as a group of persons living in a specific area or location, identified by common characteristics, and generally corresponding to a Local Council One (LC1) administrative unit.

#### **1.3.1 Scope and Coverage of the Community Module**

The community questionnaire was administered in all LC1s/villages across the country and gathered information on the services available and practices common to the communities. The 135 districts and 11 cities of Uganda were grouped into 17 Sub-regions (Figure 1.1) to facilitate statistical analysis. Data was collected on: Financial, Education and Health institutions; Manufacturing and Service establishments; Roads, Agricultural production, Environment, Violence in the community and social Economic groups.

**Figure 1. 1: Map of Uganda showing Sub-regions, Districts and Cities, 2024**

The NPHC 2024 aimed to administer the community questionnaire to all LC1 villages in the country. Overall, 10,436 parishes in the country were enumerated under the community module.

### 1.3.2 Development of Data Collection Tools

All census tools were developed, tested, and piloted in a consultative manner. In particular, the community questionnaire was developed in close consultation with the Ministry of ICT and National Guidance for harmonization with the Community Profiling Module of the Parish Development Management Information System (PDMIS). Other stakeholders consulted included the Local Governments, Ministries, Departments and Agencies.

### 1.3.3 Data Collection

The data collectors for the community module were the NPHC Parish Supervisors. These were recruited by the Chief Administrative Officers/Town Clerks/Special Area Supervisors,

with support from their respective Human Resource Departments using the UBOS e-recruitment system in line with the NPCH 2024 recruitment guidelines. Training was undertaken in three tiers; for the Trainers, supervisors and data collectors respectively.

Data collection was carried out using Computer-Assisted Personal Interviewing (CAPI). The community questionnaire was digitized and integrated into the census data collection application, which was then installed on tablets.

Data was gathered through Focus Group Discussions (FGDs) and Key Informant Interviews (KIIs). The FGDs were conducted at the village level to collect community-level information from participants, including members of the LCI committee and representatives from special interest groups such as the elderly, women, youth, and persons with disabilities.

Parish Supervisors recorded the agreed-upon information from the FGDs directly into the tablets using the application. During these discussions, participants also listed education institutions, health facilities, and manufacturing or service establishments within their communities.

Key Informant Interviews were then conducted with representatives of these institutions to gather data on registration and ownership status, as well as the number of pupils, students, teachers, or employees, as applicable. Geographic Positioning System (GPS) coordinates were captured for each institution.

#### **1.3.4 Data Processing and Analysis**

Once data collection was completed, data cleaning was undertaken to identify and address inconsistencies, outliers, and missing values. The cleaned datasets were then subjected to various statistical analyses to generate community-level statistics in line with the census objectives and the tabulation plan. Data processing and analysis were conducted using a combination of STATA 18 and Microsoft Excel for the generation of summary statistics and data organization, visualization, and the preparation of summary tables and charts for reporting purposes respectively. Data validation was also carried out, where existing records were used to cross-check the correctness of the results. This was through triangulation of the findings with the data from the Ministry of Health to improve data quality.

## 1.4 Organization of the Report

This report is structured into nine chapters as follows:

**Chapter 1** introduces the NPHC 2024 Community Module

**Chapter 2** provides information on the financial services available to the communities

**Chapter 3** details health services, including hospitals, health centres, and other related facilities

**Chapter 4** presents results on education services in the communities

**Chapter 5** discusses manufacturing and service establishments

**Chapter 6** highlights aspects of agricultural production

**Chapter 7** focuses on the environment and natural resources

**Chapter 8** addresses crime, violence, and harmful practices within communities

## 2.0 FINANCIAL SERVICES

### Key Findings

- One in every two districts and cities (49.3%) in Uganda had at least one Commercial Bank
- Eight in every ten (82.9%) of the districts and cities in the country had at least one Micro Finance Institution
- Six in every ten (64.4%) of the districts and cities had at least one Deposit Taking Institution
- The National Commercial Bank Branch Density was estimated at 2.9 per 100,000 adults

### 2.1 Introduction

Financial services in Uganda are composed of businesses and institutions that manage money and provide intermediary services to transfer and allocate financial capital in the country. The NPHC 2024 collected information on availability of selected financial services in the LC1s throughout the country. Specifically, information was gathered on Commercial Banks, Micro Finance Institutions (MFIs), Banking Agents, Mobile Money Agents, Deposit Taking Institutions (DTIs), money lenders, Village Savings and Loan Associations (VSLAs), and Savings and Credit Co-operatives (SACCOs).

### 2.2 Availability of Financial Institutions

A financial institution refers to an establishment that completes and facilitates monetary transactions, such as investments, loans, mortgages, and deposits. Uganda's financial system is characterized by the co-existence of formal and informal financial institutions.

The formal financial institutions are regulated and supervised by relevant authorities; for example, the Bank of Uganda in the case of Uganda. They include commercial banks, MFIs, DTIs, credit institutions, cooperatives, insurance companies, pension funds, capital markets, forex exchange bureaus and money transfer institutions.

Formal financial institutions mainly exist in urban areas, offering a narrow range of financial services, providing working capital mainly to medium and large-scale enterprises.

They are largely inflexible in their operations, with respect to the needs of the small-scale enterprises and the low-income earners who may not have collateral to solicit loans. In this category, the NPHC 2024 collected data on the availability of commercial banks, MFIs, DTIs, SACCOs, Banking Agents and Mobile money.

Informal financial institutions are not regulated or supervised and include savings groups, VSLAs, Rotating Savings and Credit Associations (ROSCAs), community-based money lenders and burial societies. In this category, the NPHC 2024 collected data on the availability of VSLAs and money lenders.

As guided by the National Development Plan III (NDP III), the Government of Uganda has continued to develop the financial sector and its infrastructure to catalyze the mobilization of domestic savings and investments. One of the interventions of the Financial Sector Development Strategy (FSDS) is to increase access to and use of finance, be able to channel available resources into formal platforms and offer a wide range of products and services through expanded delivery channels such as agent banking<sup>1</sup>.

## 2.3 Formal Financial Institutions

### 2.3.1 Availability of Commercial Banks, MFIs and DTIs.

The NPHC 2024 community module collected data on the availability of commercial banks, MFIs, and DTIs at the village level. The results presented in this section show the percentage of districts and cities in Uganda which had at least one type of financial institution.

The findings show that, overall, 82.9 percent of districts had MFIs, 64.4 percent had DTIs; and 49.3 percent, commercial banks. (Figure 2.1 and Table 2.1).

**Figure 2.1: Percentage of Districts and Cities with Commercial Banks, MFIs and DTIs**

The results in Table 2.1 show that Kampala Capital City had all three types of banking institutions (Commercial banks, MFIs and DTIs). Sub-regional analysis shows that

<sup>1</sup> National Planning Authority, 2020

availability of at least one commercial bank was highest in Madi, Rwenzori and Kigezi sub regions all at 66.7 percent and lowest in Karamoja sub region (27.3%) (**Table 2.1**).

### 2.3.2 Commercial Bank Branch Density

The eighth Sustainable Development Goal seeks to strengthen the capacity of domestic financial institutions, to encourage and expand access to banking, insurance and financial services for all. The recommended indicator is the number of commercial bank branches per 100,000 adults. In Uganda, adult population refers to the total population of individuals aged 18 years and above.

|                        |                                                                              |
|------------------------|------------------------------------------------------------------------------|
| <b>Indicator:</b>      | <b>The Commercial Bank Branch per 100,000 Adults</b>                         |
| <b>Computation:</b>    | $\frac{\text{No. of Bank Branches}}{\text{Adult Population}} \times 100,000$ |
| <b>Disaggregation:</b> | <b>Sub-region</b>                                                            |

This indicator, referred to as the Commercial Bank Branch Density (CBBB), was estimated based on the adult population (18+ years) and only for the commercial bank branches.

The findings show that overall, the national CBBB was 2.9; with Kampala Capital City having the highest density of 27.9. Figure 2.2 shows the Commercial Bank Branch Density for 16 sub-regions, excluding Kampala.

The results presented in Figure 2.2, show the sub-regional statistics of the CBBB for 16 sub-regions. The CBBB for Kampala Capital City was excluded from the chart for balance. The results for the 16 sub-regions show that CBBB was between 1.1 and 2.4. Five sub regions of Madi, Ankole, Sebei, Kigezi and Acholi sub regions had a CBBB of two and above, while the three sub-regions of Lango, Karamoja and Teso had the lowest CBBB, 1.4, 1.2 and 1.1 respectively.

**Figure 2.2: Number of Commercial Bank Branches per 100,000 adults, by Sub-region\***

\* The Commercial Bank Branch Density for KCCA (27.9) is excluded from the chart, for balance, though included in the computation of the National value

### 2.3.3 Availability of Banking and Mobile Money Agents

#### Banking Agents

Banking agents are retail outlets that are contracted by financial institutions to undertake banking transactions on their behalf. They offer support to banking institutions by providing complementary services, which in turn reduces congestion in the branches but on the other hand increases access to financial services.

The results show that one in every ten (12.6%) of the parishes in Uganda had at least one Banking Agent. Disaggregation by sub-region shows that Kampala Capital City had the highest (83.0%) percentage of parishes with at least one Banking Agent while Karamoja sub-region had the lowest (2.6%) (**Table 2.2**)

#### Mobile Money Agents

A mobile money agent is a person or business which serves as the main point of contact for mobile money account holders. They undertake tasks such as registration of new account holders, depositing cash onto customer accounts, processing cash withdrawal and educating customers on how to use mobile money services.

Overall, 69.6 percent of the parishes in Uganda had at least one mobile money service. Disaggregation by sub-region shows that Kampala Capital City had the highest (98.0%) percentage of parishes with at least one mobile money agent while Karamoja sub-region had the lowest (29.0%%) (**Table 2.2**)

The findings show that seven in every ten (69.6%) of the parishes had mobile money agents. The percentage was higher in urban areas (66.8%) compared to their rural counter parts (75.4%).

One in every ten (12.6%) of the parishes had a banking agent and the percentage was higher in the urban parishes (24.8%) compared to the rural ones (6.8%) (**Figure 2.3 and Table 2.2**).

**Figure 2.3: Percentage of Parishes with Banking and Mobile Money Agents, by Residence**

### 2.3.4 Availability of SACCOs

The NPHC 2024 collected data on the availability of SACCOs in the communities, with emphasis on those with a physical location. Data analysis was undertaken at parish level and the results presented show the percentage of parishes in Uganda which had at least one SACCO.

Kampala Capital City had the highest (82.0%) percentage of parishes with at least one Sacco while Madi sub-region had the lowest (24.4%) (Figure 2.4).

**Figure 2.4: Percentage of Parishes with SACCOs, by Sub-region**

Disaggregation by residence shows that, a higher percentage (48.7%) of parishes in the urban areas had at least one SACCO, compared to 44.4 percent of the parishes in the rural areas (Annex Table A2.2)

#### 2.3.4.1 Characteristics of SACCOs

Savings and Credit Cooperative Organizations (SACCOs) play an essential role in the financial sector, particularly promoting financial inclusion and providing access to savings, loans, and other financial services. SACCOs are member-based, cooperative financial institutions that are designed to help people pool their resources to offer financial products like savings accounts and low-interest loans to their members.

Data was collected from SACCOs with a physical location and the results in Table 2.3 present information on the status of SACCO registration and whether they were active or not. The results show that Kampala had 67.0 percent of SACCOs registered with the Registrar of Cooperatives. The sub-regions of Tooro (21.4%) and Madi (17.6%) reported the lowest percentage of SACCOs registered with the Registrar of Cooperatives.

Additionally, 15.0 percent of the SACCOs in Uganda reported to be registered with the Uganda Registration Services Bureau (URSB) or Uganda Revenue Authority (URA). At the sub-regional level, Kampala (47.0%) had the highest percentage of SACCOs registered with URSB while Sebei sub region had the lowest (6.9%). The findings further show that 43.8 percent of the SACCOs in Uganda were active. At the sub-regional level, 79.0 percent of the SACCOs in Kampala were active while Madi sub-region had the lowest percentage (24.4%) of active SACCOs.

## 2.4 Informal Financial Institutions

### 2.4.1 Availability of VSLAs

The Village Savings and Loans Associations (VSLAs) constitute persons who regularly meet to save money and borrow from each other. They usually depend on their own funding and have mechanisms for supporting each other. The results presented in this section show the percentage of Parishes which had at least one VSLA

The results show that **Figure 2.5: Percentage of Parishes with VSLAs, by Sub-region**

Madi had the highest percentage (96.9%) of Parishes with at least one VSLA while Sebei sub-region had the lowest (35.7%) (**Figure 2.5 and Table 2.4**)

### 2.4.2 Availability of Money Lenders

Money lenders in Uganda are an essential part of the informal financial sector, providing financial services, especially small loans to individuals and businesses who may not have access to formal banking institutions. Money lenders in Uganda include both individuals and institutions that offer loans without the stringent requirements found in traditional banks.

The NPHC 2024 data was collected on the availability of money lenders in the community (LC1). During the analysis, a parish was considered to have money lending services if at least one LC1 from that parish had the money lending service. The results presented in this report show the percentage of parishes with at least one money lending service.

The results shows that overall, 29.1 percent of parishes had access to money lenders. By sub-region, Kampala Capital City had the highest percentage (78.0%) of parishes with access to money lenders while Karamoja sub region had the least percentage (7.0%) of parishes with access to money lending services (**Figure 2.6**).

**Figure 2.6: Map Showing Percentage of Parishes with Money Lenders, by Sub-Region**

For more information on the availability of financial services, refer to the following tables:

## LIST OF TABLES

## 3.0 HEALTH SERVICES

### Key Findings

- In 2024, there were 232 hospitals in Uganda; 81 of which were Government founded
- Six in every ten (61%) of the districts and cities in the country had at least one hospital
- There were 272 Health Centre IVs in Uganda; 199 of which were Government founded
- Nine in every ten (87.7%) of the districts and cities in Uganda had at least one Health Centre IV, irrespective of the founding body

### 3.1 Introduction

Pursuant to the Uganda Vision 2040, the health sector aims at ensuring that Uganda's population is productive and can effectively contribute to socio-economic growth.

This makes the establishment of health facilities at the lower community levels important. The health system in Uganda is composed of several players including government, private providers, and traditional and complementary health practitioners. The Government of Uganda, through the Ministry of Health, aims at providing accessible and quality health care to the entire population, thus contributing to human capital development. The number and quality of health facilities in a given area is an important measure of the quality of life of the habitants in that location. The NPHC 2024 collected data on the availability of health facilities at various community levels and the findings are presented in the sections below.

### 3.2 Availability of Hospitals

A hospital is a health facility which offers all medical services including preventive, promotive, outpatient, curative, maternity, in patient, laboratory, ultrasound, emergency, blood transfusion and mortuary services. The findings on availability of hospitals in the districts and cities are presented in Figure 3.1 and Tables 3.1.

The findings show that, in 2024, Uganda had 232 hospitals, 81 of which were Government founded (**Figure 3.1 and Tables 3.1**).

The results show that 61.0 percent of the districts and cities in the country had at least one hospital, regardless of the founding body.

The results further show that 45.2 percent of the districts and cities had a government founded hospital; while 33.6 percent had religious/NGO/community hospital. Private hospitals were in 15.8 percent of the districts and cities (**Figure 3.1 and Table 3.1**).

**Figure 3.1: Percentage of Districts and Cities with at least one Hospital, by Founding Body**

Disaggregation by sub-region shows that Buganda sub-region had the highest number of hospitals (53) while Madi and Sebei sub-regions had the lowest with two hospitals each (**Figure 3.2 and Table 3.1**).

The findings show that the highest percentage of districts and cities with at least one hospital was in Kampala Capital City and lowest in Bugisu sub-region (28.6%) (**Figure 3.2 and Table 3.1**).

**Figure 3.2: Percentage of Districts/Cities with at least one Hospital, by sub-region**

### 3.3 Availability of Health Centre IVs

A Health Centre IV is a health facility which offers all medical services in Uganda. Health Centre IVs have been upgraded to offer the same services as hospitals at district level.

This section presents the findings on the availability of Health Centre IVs (HC IVs) in Uganda.

Findings on the availability of HC IVs in the districts and cities showed that in 2024, there were 272 HC IVs in Uganda, 199 of which were Government founded. (**Table 3.3**).

Results show that 87.7 percent of the districts and cities in Uganda had at least one HC IV, regardless of the founding body.

Government founded HC IVs were in 83.6 percent of the districts and cities, while religious/community/NGO in 17.1 percent and the privately founded HC IVs were in eight percent of the districts and cities (**Figure 3.3 and Table 3.2**).

**Figure 3.3: Percentage of Districts and Cities with at least one HC IV, by Founding Body**

The results further show that with the exception of Karamoja sub-region, all sub-regions had more than 60 percent of their districts and cities having HC IVs. (**Figure 3.4 and Table 3.2**).

**Figure 3.4: Percentage of Districts and Cities with at least one HC IV, by Sub-region**

### 3.4 Availability of Health Centre IIIs

A Health Centre III (HC III) is a facility which offers continuous basic preventive and curative care and provides support supervision of the community and the Health Centre II facilities under their jurisdiction. It should also have a functioning laboratory and an operation room for minor surgery. In Uganda, every sub-county should have a HC III to offer continuous basic preventive and curative care and also provide support supervision of the community and the HC II facilities under their jurisdiction.

The results reveal that there were 2,142 HC IIIs in Uganda in 2024, with the majority (1,439) being Government owned and the least, private (333) (**Figure 3.5 and table 3.6**)

Overall, 61.8 percent of the sub-counties in Uganda had at least one HC III, regardless of the founding body (**Figure 3.5 and Table 3.4**).

Majority of the HC IIIs were government founded (55.1%) and the least, private (5.2%)

**Figure 3.5: Percentage of Sub-counties with at least one Health Centre III, by Founding Body**

Disaggregation by sub region shows that the proportion of sub-counties with at least one HC III, regardless of the founding body, was highest in Kampala Capital City (100.0%) and lowest in Karamoja (42.5%) (**Figure 3.6 and Table 3.4**).

**Figure 3.6: Map showing Percentage of Sub-counties/Divisions with a Health Centre III, by Sub-region**

The average population per HC III was computed as a ratio of population per sub-region to the number of HC IIIs. Kampala Capital City had the highest average population per HC III (33,919) while Sebei sub-region had the lowest (12,576 persons) (**Figure 3.7 and Table 3.6**).

Figure 3.7: Map showing Population (in '000s) per Health Centre III, by Sub-region

For more information on the availability of health facilities, refer to the following tables:

## 4.0 EDUCATION SERVICES

### Key Findings

- Six in every ten (63.0%) of parishes in Uganda had at least one pre-primary school (61.3% for rural and 66.7% for urban areas).
- Six in every ten (58.0%) and five in every ten (44.9%) of the parishes in Uganda had at least one government and private founded primary school respectively.
- Seven in every ten (72.3%) of the sub-counties in Uganda had at least one secondary school; 66.1% of them in the rural and 86.0% in urban areas.
- Five in every ten (44.9%) and four in every ten (39.3%) of the sub-counties in Uganda had at least one government and private founded secondary school respectively.
- Every district and city (96.6%) had at least one Business Technical Vocational Education and Training (BTVET) institution, irrespective of the founding body
- Seven in ten (72.6%) of the districts and cities in the country had at least one government-founded BTVET institution

### 4.1 Introduction

**E**ducation is a key factor for the achievement of the National Development Plan objectives and other development initiatives like Vision 2040, the African Agenda 2063 and SDGs among others. The key policy thrust in the educational sector includes providing equitable access to quality and affordable education to all Ugandans. Credible data is required from all sectors to assess the performance of International, Regional and National development frameworks. The NPHC 2024 collected Information on the availability of education institutions in the communities through the FGDs while basic characteristics on the education facilities were collected from school authorities.

### 4.2 Pre-Primary Schools

A pre-primary school refers to a formal education institution, Nursery, Kindergarten or day-care facility imparting knowledge to children between the age of three to five years.

#### 4.2.1 Availability of Pre-Primary schools in Parishes

The results in this sub-section have been presented to show Parishes with at least one pre-primary school. A total of 21,905 pre-primary schools were enumerated under the community module of the NPHC 2024 (**Table 4.1**).

Results show that 63.0% of the Parishes had at least one pre-primary school.

The percentage was higher among urban parishes (66.7%) compared to rural ones (61.3%) (**Figure 4.1**).

**Figure 4.1: Percentage of Parishes with at least one Pre-Primary School, by Residence**

Kampala had the highest (86.0%) percentage of parishes with at least one pre-primary school, while Karamoja and Sebei Sub-regions had the lowest (31.0%) (**Figure 4.2 and Table 4.1**).

**Figure 4.2: Percentage of Parishes with at least one Pre-primary School, by Sub-region**

### 4.3.1 Availability of Primary Schools

This subsection presents parishes with at least one primary school as a proxy measure of access to primary education. The findings show that 8,193 (79%) of the parishes among the enumerated communities in Uganda had at least one primary school.

Findings further show that Buganda sub-region had the highest percentage (91.8%) of parishes with at least one primary school, while Karamoja sub-region had the lowest (46.4%) (Figure 4.3 and Table 4.2).

Figure 4.3: Percentage of Parishes with at least one Primary School, by Sub-region

#### 4.3.2 Founding Bodies of Primary schools

The findings show that six in every ten (58.0%) of the parishes in Uganda had at least one government founded primary school while one in every ten parishes (8.1%) had community founded schools (Figure 4.4 and Table 4.2).

**Figure 4.4: Percentage of Parishes with at least one Primary School, by Founding Body**

#### 4.3.3 Registration Status of Non-Government Founded Primary Schools

Findings on the registration status of non-government founded primary schools show that overall, 44.8 percent of the primary schools were registered with the Ministry of Education and Sports; and possessed an Education Management Information System (EMIS) number. The percentage was higher among schools in urban areas (51.9%) compared to their rural counterparts (38.5%) (Figure 4.5).

**Figure 4.5: Percentage of Non-government Founded Primary Schools with EMIS Registration, by Residence**

Kampala Capital City (62.0%) had the highest percentage of non-government founded primary schools registered with EMIS while Bunyoro had the lowest (34.7%) (Figure 4.6 and Table 4.4).

**Figure 4.6: Percentage of Non-Government Founded Primary Schools with EMIS registration, by Sub-region**

#### 4.4 Secondary Education

In Uganda, secondary schooling is formal education that takes place after primary level and before tertiary education. Secondary education is divided into two levels: Ordinary level (O-level) and Advanced level (A-level). The former lasts four years, ordinarily for students aged between 13 and 16 years, while the later lasts two years.

#### 4.4.1 Availability of Secondary Schools

The results in Table 4.5 indicate that 1,584 sub-counties (72.3%) among the enumerated communities in Uganda had at least one secondary school, with a higher proportion (86.0%) reported in urban areas compared to (66.1%) in rural areas.

Buganda sub-region had the highest percentage of sub-counties with at least one secondary school (89.6%) while Karamoja Sub-region had the lowest (25.7%) (Figure 4.7 and Table 4.5).

**Figure 4.7: Percentage of Sub-Counties with at least one Secondary School, by Sub-Region**

#### 4.4.2 Founding Bodies of Secondary Schools

The findings in Table 4.5 further show that six in ten (55.7%) of the urban sub-counties and four in ten (39.9%) of the rural sub-counties in Uganda had at least one government-founded secondary school in urban and rural areas respectively (Figure 4.8).

**Figure 4.8: Percentage of Sub-counties with at least one Secondary School, by Founding Body and Residence**

At sub-regional level, Kampala sub-region had the highest percentage (100.0%) of sub-counties with at least one government founded secondary school, while Karamoja sub-region had the lowest (19.5%) (**Table 4.5**).

#### 4.4.3 Registration of Non-Government Founded Secondary Schools

Findings show that nationally, among the non-government founded schools, nearly two thirds (66.1%) reported that they had registered and obtained EMIS numbers. The percentage of non-government secondary schools that were registered with EMIS was higher in urban areas (71.0%) compared to rural areas (58.7%) (**Figure 4.9**).

**Figure 4.9: Percentage of Non-Government Founded Secondary Schools with EMIS Registration, by Residence**

Disaggregation by sub-regions shows that the percentage of non-government founded secondary schools that had registered with EMIS was highest in Kampala (78.4%) and lowest in Acholi sub-region (56.4%) (**Figure 4.10** and **Table 4.7**).

Figure 4.10: Percentage of Non-Government Secondary Schools with EMIS Registration, by Sub-region

#### 4.5 Business Technical Vocational Education and Training Education

The Business Technical Vocational Education and Training (BTJET) training institutions are the kind that are responsible for developing the skills and knowledge of individuals for work in the country. It encompasses vocational education and training undertaken in industries, enterprises, government agencies, and in community and school settings.

#### 4.5.1 Availability of BTVET Institutions

To assess levels of access to BTVET institutions, data was collected on the existence of the institutions within the communities. The findings show that at least every district and city had a BTVET institution (96.6%). The highest percentage of BTVET institutions were privately founded (90.4%) while the least were those founded by the community (24.7%) (**Figure 4.11** and **Table 4.8**).

**Figure 4.11: Percentage of Districts and Cities with a BTVET Institution by Founding Body**

#### 4.5.2 Registration of Non-Government Founded BTVET Schools

This sub-section presents the statistics on the registration status of the BTVET institutions that were not government (private, religious, NGO, community) founded.

The results indicate that 38.0 percent of non-government founded institutions were registered with EMIS. The percentage was higher among institutions in the urban areas (44.4%) compared to those in rural areas (26.5%) (**Figure 4.12**).

**Figure 4.12: Percentage of Non-Government Founded BTVET Institutions with EMIS Registration, by Residence**

Disaggregation by sub-region shows that the percentage of non-government founded tertiary institutions that were registered in EMIS was highest in Kigezi sub-region (57.4%) and lowest in Karamoja sub-region (8.3%) (**Figure 4.13** and **Table 4.8**).

**Figure 4.13: Percentage of Non-government Founded BTJET Institutions with EMIS Registration, by Sub-Region**

For more information on the availability of education services, refer to the following tables and the Annex Tables A4.1 - A4.4:

## 5.0 MANUFACTURING AND SERVICE ESTABLISHMENTS

### Key Findings

- Six in every ten (57.9%) of the manufacturing establishments were in food, beverages and tobacco products.
- Seven in every ten (73.5%) of the manufacturing establishments were under sole proprietorship while less than one percent were statutory corporations (0.1%).
- Eight in ten (76.8%) of the enumerated service establishments were in trade.
- Eight in every ten (79.9%) of the service establishments were under sole proprietorship while less than one percent were statutory corporations (0.1%).

### 5.1 Introduction

The industrialization agenda of the NDP III seeks to provide the framework for streamlining and directing government, private sector, civil society and development partner investments towards: digitalization, mineral-led industrialization, infrastructure development, labour-intensive light manufacturing, Increased generation of more skilled, better motivated and healthier workforce for all sectors of the economy, among others. Therefore, exposition of the manufacturing and service establishments in the country provides an insight on the status of these areas.

### 5.2 Manufacturing Establishments

Manufacturing is the process of turning and refining of raw materials or parts into finished goods, through the use of tools, human labour, machinery, and chemical processing. The manufacturing industry provides an opportunity to drive growth through increased production, export promotion and import substitution. This growth ultimately contributes to job creation, increased incomes and improved quality of life.

The NPHC 2024 collected data on the manufacturing establishments available in the communities and the type of activities they undertake. The activities which were specified during the data collection were then categorized using the International Standard Industrial

Classification of all Economic activities, Revision IV (ISIC IV). The ISIC is an international reference classification of productive activities which provides a categorization that can be utilized for the collection and reporting of statistics; and is used for comparing statistical data on economic activities at the international level.

### **5.2.1: Manufacturing Establishments by Main Activity**

In line with the ISIC Rev IV, manufacturing establishments are grouped as below:

1. Food, beverages and tobacco products
2. Textiles, Wearing Apparel and Leather & Related Products
3. Wood & Wood Products and Paper & Printing & Reproduction of Recorded Media
4. Chemicals & Chemical Products and Pharmaceuticals
5. Rubber & Plastic Products
6. Basic Metals and Fabricated Metal Products
7. Computer, electronic and optical products
8. Furniture & Foam Products
9. Other Manufacturing

The NPHC 2024 results show that most of the establishments which were enumerated engaged in the manufacture of food, beverages and tobacco products; having 7,052 out of the total number of manufacturing establishments (12,190).

The findings reveal that majority of the manufacturing establishments were in the Food, beverage and tobacco category (57.9%), while the lowest were in groups of Chemicals & Chemical Products and Pharmaceuticals; and Computer, Electrical & Machinery Equipment both at 1.9% (**Figure 5.1 and Table 5.1**).

**Figure 5.1: Percentage of Manufacturing Establishments, by Activity Group**

The results in Table 5.1 and Figure 5.2 show the distribution of the manufacturing establishments by sub-region. Buganda sub-region had the highest proportion of manufacturing establishments while Sebei, the lowest (1.2%) (**Figure 5.2 and Table 5.1**).

Figure 5.2: Percentage of Manufacturing Establishments, by Sub-Region

### 5.2.2: Ownership of Manufacturing Establishments

Information was also collected on the ownership of the manufacturing establishments and the results are presented in Figure 5.3 and Table 5.2. The majority of manufacturing

establishments found in the communities enumerated were under Sole Proprietorship, accounting for 8,955 of the 12,190 total manufacturing establishments.

Nearly three quarters (73.5%) of the manufacturing establishments were under sole proprietorship while a less than one percent (0.1%) were statutory corporations (Figure 5.3 and Table 5.2).

**Figure 5.3: Percentage of Manufacturing Establishments, by Type of Ownership**

## 5.3 Service Establishments

### 5.3.1: Main Activity of Service Establishments

Services are one of the key inputs of any economic production activity. The ISIC has the services grouped into the following:

1. Utilities
2. Construction
3. Trade
4. Transport and Storage
5. Accommodation and Food Service Activities
6. Information and Communication
7. Financial and Insurance Activities
8. Real estate activities
9. Professional, Scientific and Technical Activities
10. Administrative and Support Service Activities
11. Public Administration and Defence
12. Arts, Entertainment and Recreation

According to the results presented in Table 5.3, there were 57,465 service establishments enumerated at the community level in the NPHC 2024. Most service establishments were in trade category (44,119).

Eight in ten (76.8%) of the service establishments were in trade while less than one percent were in the utilities category (0.2%).

**Figure 5.4: Percentage of Service Establishments, by Main Activity**

### 5.3.2: Ownership of Service Establishments

According to the findings on the ownership of service establishments. A total of 57,465 service establishments were enumerated.

Eight in ten (79.9%) of the service establishments were under sole proprietorships while less than one percent (0.1%) were under statutory corporation ownership (Figure 5.5 and Table 5.4).

**Figure 5.5: The Percentage of Service Establishments, by Ownership**

For more information on manufacturing and service establishments, see the tables below

**LIST OF TABLES**

## 6.0 AGRICULTURAL PRODUCTION

### Key Findings

- The most common source of communal water for production was direct rain during the season, reported by 10,147 parishes (97.2%), followed by borehole which was reported by 65.3 percent of the parishes.
- Crop diseases, insufficient agricultural land and Lack of improved seeds were common challenges of crop production; each reported by more than 94.0 percent of the parishes nationally
- Nationally, the common challenges reported by parishes in livestock production were theft of animals (93.1%) and animal pests (92.5%).

### 6.1 Introduction

The Agro-industrialisation Programme of the NDP III aims to increase commercialization and competitiveness of agricultural production and agro-processing. Statistics on agricultural production is vital in the evaluation of the practices, patterns and challenges of agricultural production in the country so that appropriate policy formulation and action is taken to increase the agricultural sector growth rate and productivity in the agro-industrial value chain. The NPHC 2024 collected data on communal sources of water for production and the major challenges faced in crop and livestock production.

### 6.2 Communal sources of water for production

Water for agricultural production refers to the availability of water within reach of farmers for crop and animal husbandry among others. Water is a critical input for agricultural production and plays an important role in food security.

In Uganda, communal water sources primarily used for production, particularly in agriculture, include large lakes like Lake Victoria, rivers like the Nile, wetlands, and boreholes. However, access to these sources can be unevenly distributed across the country and heavily reliant on seasonal rainfall, leading to shortages during dry periods.

The NPHC 2024 sought to establish the existence of and commonly used communal sources of water for production. The results present distribution of parishes that reported to have at least any water source which is used for agricultural production. A parish was taken to be using a particular communal source of water for production if at least one of its LCI/village reported to have it for that purpose.

The results on the top ten operational communal sources of water for agricultural production are shown in Figure 6.1 and Tables 6.1 & 6.2. Direct rainwater in season was the leading

common source of communal water (97.2%) while dams the least source (15%). The percentage of parishes which reported direct rain in the season as the main source was slightly higher among the rural parishes (97.8%) compared to their urban counter parts (96.0%) (**Figure 6.1, Table 6.1 and Table 6.2**).

**Figure 6.1: Percentage Distribution of Parishes, by Types of Communal Sources of Water for Production<sup>1</sup>**

Note<sup>1</sup>: "Other sources" include valley tank, farm pond, lake water, rock water and others; Percentages were generated from multiple response question

### 6.3 Common Challenges of Crop Production

The NPHC 2024 collected data on the common challenges to crop production. The leading challenge to crop production was crop diseases (95.3%), while straying animals was reported as the least (71.7%). Rural parishes reported higher percentages of crop production challenges across all the domains compared to urban parishes, with the exception of rural-urban migration, which was more pronounced among urban parishes (**Figure 6.2, Table 6.3 and Table 6.4**).

**Figure 6.2: Percentage of Parishes, by Challenges of Crop Production Reported\***

\* Percentages were generated from multiple response question

The results in Table 6.4 further show that Bukedi, Madi and West Nile had the highest

percentage of parishes with a challenge of crop diseases, each reporting at least 98%; while Kampala had the lowest (49.0%). West-Nile had the highest proportion of parishes reporting deforestation (90.0%), damage predators (97.3%), insufficient manpower (92.9%), insect infestation (96.2%) and insufficient rainfall (98.4%) as challenges to crop production.

### 6.4 Common Challenges of Livestock Production

Livestock production is part of the agriculture, forestry and fishing sector but is constrained by various factors, thereby affecting its contribution to Uganda’s economic growth. The NHPC 2024 collected data on the common challenges to livestock production which were faced by the communities. These were broadly categorized as pests of animals, epizooties (widespread diseases in animals), theft of animals, lack of pasture, conflicts with crop farmers and land conflict. The biggest number of parishes (9,719) reported theft of animals as the common challenge to livestock production.

The results show that the leading mo **Figure 6.3: Percentage of Parishes reporting Challenges** theft of animals (93.1%) while epizooties (77.3%) were the least common challenge to livestock production (6.3a and Table 6.4)

\* Percentages were generated from multiple response question

At the sub-regional level, theft of animals was reported highest in West Nile sub-region (98.4%) and lowest in Kampala sub-region (59.0%) (**Tables 6.5 and 6.6**).

For more information on production in the communities, refer to the following tables:

#### LIST OF TABLES

## 7.0 ENVIRONMENT

### Key Findings

- Seven in every ten (67.9), six in every ten (59.7%) and four in ten (43.9%) of the parishes in the country had wetlands, natural water bodies and natural forests/woodlands respectively.
- Half (50.5%), three in every ten (26.1%) and four in every ten (36.4%) of the parishes reported that they had encroachment of wetlands, natural forests/woodlands and natural water bodies respectively.
- Change in rain seasons was the most observed climate change reported by eight in every ten (75.7%) of the parishes.
- Famine and drought were the most experienced climate-related disasters reported by 63.7 percent and 63.1 percent of the LCIs/villages respectively.
- Eight in every ten (80.4%) of the parishes reported damage of crops as an effect of climate-related disasters; while seven in ten (71.8%) reported loss of livestock.

### 7.1 Introduction

Economic Growth Strategy of the NDP III focuses on five key objectives which include exploitation of natural resource endowments with environmental protection in mind. In line with this, the NPHC 2024 collected data on availability of wetlands, natural forest/woodlands and natural water bodies, including the status of encroachment on these natural resource endowments. Uganda seeks to ensure that there is appropriate adaptation and mitigation strategies on climate change to realize sustainable industrialization agenda. NDP III has highlighted the climate change agenda as a critical factor for sustainable exploitation of the key growth opportunities of agriculture, minerals, petroleum and tourism, and increased incomes and quality of life<sup>2</sup>. The NPHC 2024 also collected data on climate change.

### 7.2 Land Cover

Land cover refers to the observed physical cover on the earth's surface, including vegetation (natural or planted) and human constructions<sup>3</sup>. It includes features such as water bodies, forests, grasslands, wetlands, bare soil, snow or ice, urban areas, industrial sites, and agriculture. Knowledge of land cover is used in areas like urban planning, environmental management, disaster risk reduction, and climate change studies, among

<sup>2</sup> National Planning Authority, 2020

<sup>3</sup> FAO definition. <https://www.fao.org/4/x0596e/X0596e01e.htm>

others.

The NPHC 2024 collected data on the availability of wetlands, natural forests/woodland and natural water bodies for all communities in Uganda. These natural endowments are considered to be critical because they support human life through production of essential goods and services, and act as biodiversity conservation systems.

Availability of these resources increases the socio-economic prospects and resilience of the community through ensuring sustainable food production, provision of water for domestic use and production, biodiversity conservation and wastewater purification, among others. This therefore makes it essential to protect them against damage to ensure optimization of their benefits across generations.

The results show that seven in every ten (67.9), six in every ten (59.7%) and four in ten (43.9%) of the parishes had wetlands, natural water bodies and natural forests/woodlands respectively.

The results further show that half (50.5%), three in every ten (26.1%) and four in every ten (36.4%) of the parishes reported that they had encroachment of wetlands, natural forests/woodlands and natural water bodies respectively (**Figure 7 1, Table 7.1 and 7.2**)

**Figure 7.1: Percentage of Parishes, Reporting Encroachment by Type of Land Cover**

Disaggregation by sub-region shows that, encroachment of wetlands was highest in Lango sub-region (72.1%) and lowest in Karamoja sub-region (11.4%). Results further show that encroachment of forests/woodland was highest in Madi sub region (40.5%) and lowest in Kampala Capital City (9.0%) while encroachment of natural forests/woodlands was highest in Madi sub-region and lowest in Karamoja sub-region (14.7%) (**Table 7.1**).

**7.3 Climate Change**

Climate change refers to long-term shifts in temperatures and weather patterns. Such shifts can be natural but have been mostly accelerated by human activities including Fossil fuel use, deforestation, and some agricultural and industrial practices. It is a global issue, and Uganda is ranked among the vulnerable countries due to its limited capacity to cope. Additionally, the country’s population is highly agro-based and depends on the environment and natural resources for survival. Therefore, any climate shock creates significant damage and loss.

The NPHC obtained data on climate change over the 10-year period preceding the census; specifically asking the observed change in the climate. This was aimed at understanding how knowledgeable communities were, regarding climate change.

The results show that change in rain seasons was the most observed climate change reported by eight in every ten (75.7%) of the parishes (Figure 7.2 and Table 7.3)

Figure 7.2: Percentage of Parishes, by Observed Climate

Disaggregation by sub-region shows that change in rain seasons was reported highest in Kampala Capital City (87.0%) and lowest in Rwenzori sub-region (65.0%) (Table 7.3).

7.4 Disasters

7.4.1 Climate-related Disasters

Climate related disasters are events that cause serious harm to people, loss and damage to infrastructure, economies, or the environment, and the affected community cannot handle it alone. These types of disasters are mainly as a result of weather conditions like extreme temperatures, floods and earthquakes.

Data was collected on the different disasters which were experienced by the communities in the twelve months preceding the census. The climate-related disasters/shocks on which their occurrence was established included: floods, drought, famine, landslides, hail/windstorm, soil erosion, and lightning.

The results show that famine (63.7%) was the most reported climate-related disaster and landslides the least (12.2%) (Figure 7.3 and table 7.4).

**Figure 7.3: Percentage of Parishes that experienced Climate-related Disaster 12 months preceding the Census, by Type of Disaster**

Disaggregation by sub-region shows that Karamoja sub-region had the highest percentage of parishes that experienced famine (86.8%) while Kampala Capital City (30.0%) had the lowest (Table 7.4).

#### **7.4.2 Other Disasters in the Communities**

The NPHC 2024 also collected data on the occurrence of other disasters/shocks including crop/pest infestation, livestock parasites and diseases, disease outbreak, conflict, fire. Table 7.4 shows that at national level, most parishes experienced crop pest infestation (87.3% nationally) and livestock parasites and diseases (86.6% nationally). At the sub-regional level, Madi had the highest proportion of parishes (96.9%) that reported experiencing crop pest infestation.

#### **7.4.3 Effects of the Disasters in the Communities**

The NPHC 2024 sought to understand how the community was affected by the disasters experienced in the 12 months preceding the census. Disaster occurrences come with different effects depending on the magnitude, the vulnerability status and level of preparedness of a community. The presentation of results in this section has the effects on human life, crops and livestock, from those on facilities, infrastructure and the environment.

7.4.3.1 Effects of Disasters on Human Life, crops and livestock

The results show that the most experienced effect of disaster was damage to crops experienced by 80.4 percent of the parishes while missing of people the least (19.4%) (Figure 7.4).

Figure 7.4: Percentage of Parishes, by Effect of Disaster and Sub-region

Disaggregation by sub-region shows that Karamoja sub-region had a higher percentage of parishes that reported damage to crops (92.3%) while Kampala Capital City the least (33.0%) (Table 7.8).

7.4.3.2 Effects of Disasters on Infrastructure, the Environment and Facilities

The results show that damage to transport infrastructure (67.3%) was the leading the effect of disasters on infrastructure, facilities and environment while damage to power and energy infrastructure was the least (27.4%) of the parishes (Figure 7.5 and Table 7.8).

## 8.0 CRIME, VIOLENCE AND HARMFUL PRACTICES

### Key Findings

- Theft/ burglary/robbery was the highest form of crime reported in communities; accounting for 88 percent (9,151) of the parishes
- Domestic violence was experienced in 91 percent of the parishes
- Thirty-five percent of the parishes reported existence of rape in their communities
- Four and three percent of the parishes reported that child and adult sacrifice was common in their communities respectively
- Child battering/neglect was reported by about 72 percent of the parishes
- Sixty-two percent of parishes experienced child marriages and three percent, FGM

### 8.1 Introduction

**T**he NPHC 2024 collected data on violence, crimes and harmful practices which were commonly experienced in communities during the 12 months preceding the census undertaking. This data was obtained through FGDs where community leaders, elders and other representatives discussed and agreed on a position.

During data collection, crime was categorized to include thefts/burglary/robbery, murder, land evictions/grabbing and cattle rustling. Information was also collected on violence and harmful practices from the community members.

### 8.2 Crime in the communities

The results presented in this section show parishes which experienced selected types of crimes in the last 12 months preceding the census. The results in Figure 8.1 and Table 8.1a indicate that 87.7 percent of the parishes reported that theft/burglary/robbery occurred in their location during the 12 months preceding the NPHC 2024 census.

Land evictions/grabbing was experienced by 47.8 percent of the parishes.

Murder was experienced by the least percentage of the parishes (25.1%).

**Figure 8.1: Percentage of Parishes by Commonly Experienced Crimes**

As shown in Figure 8.2, experience of crimes by type of crime was nearly equally prevalent in the rural and urban areas. However, the findings reveal that murder and thefts/burglary/robbery was reported slightly higher in the urban areas by 0.9 and 0.6 percentage points respectively while cattle rustling and Land evictions was higher in rural areas by 3.2 and 2.7 percentage points respectively.

**Figure 8.2: Percentage of Parishes by Common Crimes and Residence**

Sub-regional differentials show that theft/burglary/robbery was most predominant in Kampala; reported in 95.0 percent of the parishes; followed by Tooro (91.8%), Bunyoro (91.5%), and Lango (91.3%). Bugisu, sub-region had the lowest percentage of their parishes reporting theft/burglary/robbery at 81.0 percent. Land evictions/grabbing was

more predominant in the parishes of Madi and Karamoja sub-region at 74.8 percent and 72.5 percent respectively; and was reported least in Rwenzori subregion (30.5%). Cattle rustling/theft was reported to have been most experienced by the communities in Karamoja sub-region (89.9%), followed by Sebei (50.9%) while Kampala had the least percentage of parishes experiencing cattle rustling/theft at 10.0 percent. Details are in Table 8.1a and Table 8.1b.

**Domestic Violence (DV)** according to the Domestic Violence Act, 2010 constitutes any act or omission of a perpetrator which—(a) harms, injures or endangers the health, safety, life, or well-being, whether mental or physical, of the victim or tends to do so and includes causing physical abuse, sexual abuse, emotional, verbal and psychological abuse and economic abuse;(b)harasses, harms, injures or endangers the victim with a view to coercing him or her or any other person related to him or her to meet any unlawful demand for any property or valuable security;(c)has the effect of threatening the victim or any person related to the victim by any conduct mentioned in paragraph (a) or (b); or(d)otherwise injures or causes harm, whether physical or mental, to the victim.

**Rape** is a form of sexual violence where sexual intercourse, or other forms of sexual penetration are performed on the victim without their consent.

**Domestic violence** is a great concern to any community from the human rights, economic and health perspective. The Government has put in place legislature and other measures to address domestic violence. Up-to-date and reliable data is required to address national, regional and international commitments to the reduction/elimination of Gender Based Violence in general and domestic violence in particular.

### 8.3 Domestic Violence and Rape in the Communities

The analysis in this chapter considers a parish to have domestic violence or rape if at least one of the LC1s within the parish had a case in the 12 months preceding the census. The results presented in Figure 8.3 show the percentage of parishes which experienced domestic violence and rape in the 12 months preceding the census, by residence.

The NPHC 2024 findings reveal that domestic violence was reported in 91.3 percent (9,524 in absolute terms) of the parishes in Uganda while rape was in 35.2 percent (3,671 parishes). Refer to Figure 8.3 and Table 8.2 for more details.

Domestic violence was reported by a slightly higher percentage of parishes in the rural areas (91.9%) as compared to those in the urban (89.9%). Rape however was slightly higher in urban (35.6%) areas than in rural (35.0%) ones.

**Figure 8.3:Percentage of Parishes which experienced Rape and Domestic Violence, by Residence**

Sub-regional disaggregation shows that the percentage of parishes which commonly experienced domestic violence was highest in Madi and Acholi (96.2% and 95.6% respectively) while Bugisu and Rwenzori had the lowest (85.6% and 85.8% respectively). The results presented in Table 8.2 show the percentage of parishes which commonly experienced rape during the 12 months preceding the census by sub-region. Rape was reported highest in Kampala with 54.0 percent followed by Lango Sub-region (47.0%), while Rwenzori had the lowest (19.5%).

#### 8.4 Sacrifices and Disappearance of Residents

The NPHC 2014 collected data about the community experience of child sacrifice, adult sacrifice and disappearance of residents in the 12 months preceding the census.

Overall, about 4.2 percent (435 parishes) and 2.8 percent (288 parishes) of the parishes respectively, reported child sacrifice and adult sacrifice as being common in their communities (Table 8.3).

Disappearance of residents from the communities was reported in 1,701 parishes (16.3%). This was reported by a slightly higher percentage of parishes in the rural areas (16.8%) as compared to those in the urban areas (15.2%).

– Figure 8.4

**Figure 8.4:Percentage of Parishes which experienced sacrifices and disappearance of residents, by Residence**

The results in Table 8.3 revealed that at sub-regional level, there was a comparatively high percentage of parishes in Kampala which reported disappearance of residents during the

12 months preceding the census (42.0%) followed by Karamoja at 23.3 percent, while Sebei had the least percentage (11.9%).

On the other hand, Kampala had the highest percentage of parishes reporting child sacrifice (10.0%) while Sebei had the lowest (1.4%). Adult sacrifice was most reported in Kampala sub-region (6.0% of the parishes) and least reported in Teso sub-region (0.7% of the parishes) as shown in Table 8.3.

**8.5 Harmful practices and Child-related Violence**

Harmful practices, including child marriages and Female Genital Mutilation (FGM), are human rights violations, bearing negative consequences on the victims. FGM and child marriages rob girls of their childhood, deny them the chance to determine their own future, and threaten the well-being of societies.

In some societies in Uganda, FGM could be preparing the girls for marriage and therefore goes hand in hand with child marriage. The results presented in Figure 8.5 and Table 8.4 show that 7,528 (72.1%) of the parishes in Uganda had at least one parish reporting that it commonly experienced child battering/neglect, while 62.2 percent experienced child marriages and 3.1 percent experienced FGM.

**Figure 8.5:Percentage of Parishes which Experienced Harmful Practices and Child-related Violence**

The results in Table 8.4 show that, there was a comparatively high percentage of parishes in Madi and Lango which experienced child battering/neglect during the 12 months preceding the census with 84.7 percent and 82.0 percent respectively, while Sebei sub-region had the least percentage (58.5%).

Child marriages were reported by relatively a higher percentage of parishes in Madi sub-region with 88.5 percent followed by West Nile with 84.5 percent while Kampala had the lowest with 47.0 percent.

Female Genital Mutilation was most commonly reported in Sebei sub-region with 6.5 percent of the parishes. The sub-regions of West Nile (1.1%) and Teso (0.9%) had the lowest percentage of parishes reporting FGM.

For more information on crime, violence and harmful practices, refer to the following tables:
